Explanations:**Contributed Useful or Innovative Suggestions:**

Ryan and Barak contributed a lot of insightful information on the hardware aspects of computer architecture designs.

Contributed to Project Management and Control:

Abraham wrote a lot of the team emails to our mentor and teaching assistants.

Did Share of Assigned Technical Work:

Abraham and I spent a lot of extra time compiling and setting up the simulation environment on the TACC supercomputer.

Assisted in Preparation of Written Reports:

Justin frequently held our writing sections to a high standard and provided many useful contributions to the editing process.
